

IPersistence

```
classDiagram
    class IPersistence
    class PersistenceImplementationWrapper
    PersistenceImplementationWrapper --|> IPersistence
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'IPersistence', which represents an interface. Below it is a box labeled 'PersistenceImplementationWrapper', which represents a concrete implementation. A blue arrow points from the 'PersistenceImplementationWrapper' box up to the 'IPersistence' box, indicating that the wrapper implements the interface.
