

/home/runner/work/cpp
-sdk/cpp-sdks/libs/common
/include/launchdarkly/bindings
/c/memory_routines.h

```
graph TD; A["/home/runner/work/cpp  
-sdk/cpp-sdks/libs/common  
/include/launchdarkly/bindings  
/c/memory_routines.h"] --> B["launchdarkly/bindings  
/c/export.h"]; A --> C["stdbool.h"];
```

The diagram illustrates a file hierarchy. A top box (shaded gray) contains a path: /home/runner/work/cpp, followed by -sdk/cpp-sdks/libs/common, then /include/launchdarkly/bindings, and finally /c/memory_routines.h. Two blue arrows point from this top box to two bottom boxes. The left bottom box (white) contains launchdarkly/bindings and /c/export.h. The right bottom box (white with a gray border) contains stdbool.h.

launchdarkly/bindings
/c/export.h

stdbool.h
