

launchdarkly::server
_side::IClient

```
graph BT; Client[launchdarkly::server_side::Client] --> IClient[launchdarkly::server_side::IClient];
```

A UML class diagram showing an inheritance relationship. A light gray box at the bottom represents the base class 'launchdarkly::server_side::Client'. A blue arrow points upwards from this box to a white box at the top, which represents the derived class 'launchdarkly::server_side::IClient'. The arrow indicates that 'Client' inherits from 'IClient'.
