

/home/runner/work/cpp
-sdk/cpp-sdks/libs/common
/include/launchdarkly/bindings
/c/status.h

```
graph TD; A["/home/runner/work/cpp  
-sdk/cpp-sdks/libs/common  
/include/launchdarkly/bindings  
/c/status.h"] --> B["launchdarkly/bindings  
/c/export.h"]; A --> C["stdbool.h"];
```

The diagram illustrates a file hierarchy. A top-level box (shaded gray) contains the path `/home/runner/work/cpp-sdks/cpp-sdks/libs/common/include/launchdarkly/bindings/c/status.h`. Two blue arrows point from this box to two lower boxes. The left box (white) contains `launchdarkly/bindings/c/export.h`. The right box (white) contains `stdbool.h`.

launchdarkly/bindings
/c/export.h

stdbool.h
