

launchdarkly::server
_side::IClient

```
graph BT; Client[launchdarkly::server_side::Client] --> IClient[launchdarkly::server_side::IClient];
```

A UML class diagram showing an inheritance relationship. The base class, `launchdarkly::server_side::IClient`, is represented by a white box with a black border. The derived class, `launchdarkly::server_side::Client`, is represented by a gray box with a black border. A solid blue arrow points from the derived class box to the base class box, indicating that `Client` inherits from `IClient`.
