

launchdarkly::server
_side::data_interfaces
::IDestination

launchdarkly::server
_side::IChangeNotifier

launchdarkly::server
_side::data_components
::ChangeNotifier

```
graph LR; A[launchdarkly::server_side::data_components::ChangeNotifier] --> B[launchdarkly::server_side::data_interfaces::IDestination]; A --> C[launchdarkly::server_side::IChangeNotifier];
```

The diagram illustrates the relationship between three LaunchDarkly server-side classes. A central gray box on the right, labeled 'launchdarkly::server_side::data_components::ChangeNotifier', has two blue arrows pointing left to two white boxes. The top white box is labeled 'launchdarkly::server_side::data_interfaces::IDestination' and the bottom white box is labeled 'launchdarkly::server_side::IChangeNotifier'. This indicates that the 'ChangeNotifier' class inherits from or implements both the 'IDestination' and 'IChangeNotifier' interfaces.
