

/home/runner/work/cpp
-sdk/cpp-sdks/libs/common
/include/launchdarkly/bindings
/c/value.h

```
graph TD; A["/home/runner/work/cpp  
-sdk/cpp-sdks/libs/common  
/include/launchdarkly/bindings  
/c/value.h"] --> B["stdbool.h"]; A --> C["launchdarkly/bindings  
/c/export.h"]
```

The diagram illustrates a file hierarchy. A top-level box (shaded gray) contains a path: /home/runner/work/cpp, followed by -sdk/cpp-sdks/libs/common, then /include/launchdarkly/bindings, and finally /c/value.h. Two blue arrows originate from the bottom of this box. The left arrow points to a box containing stdbool.h. The right arrow points to a box containing launchdarkly/bindings and /c/export.h.

stdbool.h

launchdarkly/bindings
/c/export.h
