

launchdarkly::data  
\_sources::IDataSource

std::enable\_shared  
\_from\_this< PollingDataSource >

launchdarkly::client  
\_side::data\_sources::  
PollingDataSource

```
graph LR; A[launchdarkly::client_side::data_sources::PollingDataSource] --> B[launchdarkly::data_sources::IDataSource]; A --> C[std::enable_shared_from_this< PollingDataSource >];
```

The diagram illustrates the class hierarchy for the `PollingDataSource` class. It is a `std::enable_shared_from_this` derived class and inherits from the `launchdarkly::data_sources::IDataSource` interface.
