

launchdarkly::data
_sources::IDataSource

std::enable_shared
_from_this< PollingDataSource >

launchdarkly::server
_side::data_sources::
PollingDataSource

```
graph LR; A[launchdarkly::server_side::data_sources::PollingDataSource] --> B[launchdarkly::data_sources::IDataSource]; A --> C[std::enable_shared_from_this< PollingDataSource >];
```

The diagram illustrates the class hierarchy for the `PollingDataSource` class. It is a `std::enable_shared_from_this< PollingDataSource >` class and inherits from `launchdarkly::data_sources::IDataSource`.
