

```
launchdarkly::client  
_side::data_sources::  
  IDataSource
```

```
std::enable_shared  
_from_this< PollingDataSource >
```

```
launchdarkly::client  
_side::data_sources::  
  PollingDataSource
```

```
graph LR; A[launchdarkly::client_side::data_sources::PollingDataSource] --> B[launchdarkly::client_side::data_sources::IDataSource]; A --> C[std::enable_shared_from_this< PollingDataSource >];
```

The diagram illustrates the relationship between three code snippets. A central gray box on the right contains the snippet for `PollingDataSource`. Two blue arrows originate from this box: one points to the top-left white box containing the snippet for `IDataSource`, and the other points to the bottom-left white box containing the snippet for `std::enable_shared_from_this`. This indicates that `PollingDataSource` inherits from `IDataSource` and is a shared class.
